106 ELGIN STREET

7:30 PM

The initial study of this Provincially Significant Wetland began in 2011, in response to the mass die-off of the trees within the wetland. An expanded Research Group was formed by MVFN in the summer of 2013, commissioned to complete research into the causes of the die-off, and to prepare a report on findings and recommendations for remediation.

ADMISSION FEE \$5 NO FEE FOR MVFN MEMBERS
